## EasyBuild at the Fred Hutch

John Dey [jfdey@fredhutch.org](mailto:jfdey@fredhutch.org)

5<sup>th</sup> EasyBuild Users Meeting Jan 29, 2020

Parc Tecnològic - Barcelona, Spain

# Using EasyBuild at the Fred Hutch

---

- Using EasyBuild since 2015
- Many issues with library consistency early in usage
  - pkg-config and multiple library versions
  - Line between OS packages and EasyBuild as blurry
- Local R and Python module lists are very large
- Developed EasyUpdate to manage R and Python
- Update R within a week of each new release
- Significant support for Bioinformatics Packages

<https://github.com/FredHutch/easybuild-life-sciences>

# EasyUpdate for R and Python

---

Initial use of EasyBuild as a build tool – not focused on library support

During 2019 Hutch changed how we support local R and Python modules – Using foss-2018b

Switched from a single EasyConfig to using Bundles

Support building of the community release of R and Python

Contribute as much as possible

Utilize existing EasyConfigs

Local Support for latest R and Python – BioConductor

# Custom R and Python EasyConfig

```
easyblock = 'PythonBundle'

name = 'Python'
version = '3.7.4'
versionsuffix = '-fh1'

dependencies = [
    ('Python', '3.7.4'),
    ('pytest', '5.0.1', '-Python-%(pyver)s'),
    ('pybind11', '2.3.0', '-Python-%(pyver)s'),
    ('matplotlib', '3.1.1', '-Python-%(pyver)s'),
    ('Biopython', '1.74', '-Python-%(pyver)s'),
    ('Pysam', '0.15.3', '-Python-%(pyver)s'),
    ('pybedtools', '0.8.0', '-Python-%(pyver)s'),
    ('jupyter', '1.0.0', '-Python-%(pyver)s'),
    ...
]
exts_defaultclass = 'PythonPackage'

exts_list = [
    ('only local differences', '1.0.0'),
]
```

# Updated EasyUpdate

- Refactor easy\_update to read dependencies
- Read exts\_list from dependencies
- Python is becoming a significant dependency for Bioinformatics
- exts\_defaultclass = 'PythonPackage'

# Easy Update Dependency Checking

## Dependency Checking Single Library

```
./easy_update.py --rver 3.6 --search rstan
```

```
BioConductor version: biocver not set
```

```

```

**48 Dependencies for rstan**

# Easy Update Dependency Checking

---

Dependency Checking Single Library with an EasyConfig file  
exts\_list is populated from EasyConfig

```
./easy_update.py R-3.6.2-foss-2018b.eb --search rstan  
  ('StanHeaders', '2.21.0-1'),  
  ('inline', '0.3.15'),  
  ('loo', '2.2.0'),  
  ('rstan', '2.19.2'),
```

- Only 3 Dependencies for rstan
- First 46 dependencies are in the base EasyConfig

# EasyUpdate PythonBundle

```
/easy_update.py --verbose wot-1.0.8-foss-2018b-Python-3.6.6.eb
```

# Fred Hutch EasyBuild Environment

---

Using Docker containers for building EasyConfigs

Base container with EasyBuild, toolchain and Lmod

No Build or development tools in the container

Each easyconfig is built in a clean environment

Releases of New Toolchains

Release new R for toolchains - R dependences

Start bounty program to accelerate package building

Thank you

**FRED HUTCH**
